**Dear Hiring Manager,**

I am deeply interested in applying for a position in case of availability and I am sure that my acquired abilities as an architect-engineer and as a project manager combined with my commitment and my eagerness to learn could be suitable to perform as part of your team.

I have professional experience as an architectural designer and as a developer of the entire proposals from the first interaction with the client until the formal handing over of the final project. Part of my daily tasks were to create a dialog with sketches, coordinate details with a multi professional team, and use my software to achieve deep level of involvement and quality. As a complement, I have performed as a Project Construction Manager with the responsibility to reach the final building process under established goals of quality and time. Supervised and coordinated with the constructor, the contractors, the client and the Architecture department keeping the budget updated and under control. It is worth mentioning my active participation in a Shopping Mall of over 76000sqm built where I performed as a coordinator and supervisor with the responsibility to solve problems in situ under the requirements of foreign clients and designers. The process was established under strict target dates and the expenses and additional requirements had to be up to date in relation with the client's budget.

I have recently enriched my Architectural degree with an English Master of Science in Architectural Engineering at Politecnico di Milano, where I have been immersed in an international environment which expanded my interpersonal and cultural competencies.

It is therefore that I attach my resume for your review. Thank you for the attention and consideration you may give to my request. I look forward to hearing from you soon.

Sincerely,

Londra Valencia
